

OSMO SYSTEM FOR VENTILATION CONTROL

**IN CASE OF 230V POWER SUPPLY CUT ,
INDEPENDENT OPERATION FOR UP TO 24 HOURS**

MOTOR CONTROLLER BASIC CONTROLLER

REF.: 4C29010

DESCRIPTION:

A simple, easy-to-use controller for operating motors manually or through an auxiliary input.

- MOVEMENT POSITIONS: Open, Close, Stop.
- MANUAL CONTROL FOR UP TO 24 HOURS WITHOUT 230 V: the motor with built-in batteries provides autonomy to move without electricity.
- AUTOMATIC: external operation via "AUXILIARY" or "0-10 V" input.
- INDICATOR: light signal for power failure and operation.
- Complies with IP56 sealing rating requirements.

OPERATION:

Manual: OPEN – turns the motor in one direction / CLOSE – turns the motor in the opposite direction / STOP – motor stopped.

Automatic: AUTO – automatic motor movement according to the external commands received.

TECHNICAL DATA:

12V / 230V

Dimensions length /width / height: 150 x 200 x 80 mm

Weight: 0,650 kg
